To ascertain any day of the week: find the required year and then look to the right for the month. Follow across to find the number that matches year and month. Then use that number to select the day column and follow downward for the date. For example, 4 July 1918: find 1918 and then go across to see that July equals 1. Read the first day column to see that 4 July 1918 was a Thursday.
